**B. RESPONSE TO QUERIES**

QUERY/ISSUE	BAC/END-USER RESPONSE/CLARIFICATION
May we clarify the number of hardware unit/s that is being pertained from the LOT requirement? One lot does not indicate the actual number of the hardware units and accessories that is expected to be delivered.	Please be informed that the quantity requirement for the network equipment is one (1) unit.
May we request this wording to be changed to generic or be omitted 2.4.1.4. Circuit cross-connect (CCC) because this can only be complied by a single brand, and it is proprietary to them.	The End-user unit decided this will not be omitted as this term is the generic word for "equipment that allows configuration of transparent connections between two circuits", wherein the circuit can be a Frame Relay data-link connection identifier (DLCI), an Asynchronous Transfer Mode (ATM) virtual circuit (VC), a Point-to-Point Protocol (PPP) interface, a Cisco High-level Data

	Link Control (HDLC) interface, or a Multiprotocol Label Switching (MPLS) label-switched path (LSP).
May we clarify if the operating temperature, humidity, and MTBF are necessary to be exact?	Please be informed that the technical specifications reflected in the bidding documents are just of minimum requirements. Bidder/s may opt to offer better specifications.

**ADDITIONAL INSTRUCTION/S:** Prospective bidder/s are required to **amend** the form to update existing information. **Non-compliance with this requirement shall be ground for disqualification.**

Please be guided accordingly.
